Election/Restrictions

Applicant's election without traverse of Claim 31-32 in the reply filed on 2/8/07 is acknowledged. In addition applicant as added claims 33-41.

Claim Rejections - 35 USC § 103

The Examiner has read and reviewed all of the information provided by the Applicant. The examiner rejects as final claims 31-41 under 35 USC 103.

The Applicant attention is re-drawn to the following:

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 31-41 are rejected under 35 U.S.C. 103(a) as being unpatentable over Estes (U.S. Patent 6,508,398) in view of Mishkin (book "The Economics of Money, banking, and financial markets" page 105-109)

Claims 31:

Method of operating an ATM comprising:

- a) charging customers for services rendered by the ATM (the examiner claims official notice that ATMs charge fees)
- b) predicting a time when usage of the ATM by customer will increase (see Estes, column 1, line 46 "monitor")

Although Estes does not have "increasing chages at ATM during said times", Mishkin claims "supply and demand curve." The concept of a Supply and Demand curve is so well know the examiner considering using Official Notice. The examiner acknowledges this particular reference is referring to interest rate but clearly it applies to any item and certainly a commodity like ATM fees. It is a very well know concept in Economics and Marketing that the higher the demand (in this case more usage of ATM) the higher a price one can change. This concept has been used for centuries – charge more for phone calls at peak time or airline tickets or whatever is in demand. Applying this to ATM charges is clearly obvious.

Therefore it would have been obvious to one of ordinary skill in the art at the time the invention was made to add "supply and demand curve" as taught in Mishkin to Estes.

It is clear that one would be motivated to capture the highest possible revenue.

Claims 32:

Time coincides with public events occurring near the ATM

The examiner argues Office Notice that it is well know to one of ordinary skill in the art at the time of the invention that a public event will mean more people and more people will mean more potential ATM users.

Claims 33 & 36 & 37 & 38 & 39 & 40 & 41:

ATM send performance data to a server for every transaction including type and time of occurrence. (see Estes, column 1, line 46 "monitor" & column 2, line 25-58, "monitor ... the transactions")

Claims 34:

Application/Control Number: 09/966,027

Art Unit: 3693

ATM responds to commands for altering operation of ATM (see Estes, Figure 1 item 28)

Claims 35:

- A) transmitting performance data (see Estes, column 2, line 25-58)
- B) Analyzing the data (see Estes, column 2, line 25-58)

Examiner Comments

At the end of the day this case is about applying basic 101 marketing and economic principals to an ATM transaction. Any freshman in college would understand and apply these basic principals. Nothing novel is happening with in the ATM (hence the Estes) and nothing novel is happen with the pricing (hence the Mishkin). Either the applicant needs to significant change the claims toward a part of this invention that is novel or I would recommend abandoning this case altogether.

Response to Arguments

Applicant's arguments filed 11/13/06 have been fully considered but they are not persuasive.

In particular, and respect to Claim 1 the Applicant argued 1st. Claim 31 & 32 is not seen in the references.

The Examiner has considered the applicants argument but is moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action.

Application/Control Number: 09/966,027

Art Unit: 3693

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Contact Information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kirsten S. Apple whose telephone number is 571.272.5588. The examiner can normally be reached on Monday - Friday 9:00-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Kramer can be reached on 571-272-6783. The fax phone number for the organization where this application or proceeding is assigned is 571-272-6126.
